

Newfield
New Jersey

My Dear Sir: Aug. 25. 82

Many thanks for
your favor of the 26th
July with determination
of my fungi.

The fungus on 3569 to which
I wished to call your attention
appears to have escaped your
observation. It is a little
reddish elliptical peziza
shaped thing with spores.

- Conidia -  - very curi-
ous -

I am much pleased
with your Syllabus
will get subscribers
if I can. I send a
small package spec.
as numbered in
this

Is the Polyformstenella
Burk. & Cooke specifically
distinct from P. farinellus Fr.?

Hoping you will
not find it burden-
some to answer my
inquiries I remain
Very Truly

Yours

J. B. Ellis
