

Newfield
New Jersey
Aug. 6. 1881

Dear Friend & Colleague

I send you with
this a small package
of Specimens on which
I should be glad to
have your opinion as
I am not certain
about them myself

57. is perhaps only a form
of *Leptosphaeria Typharum*
but the Sporidia are broader
er & perithecia perhaps more
prominent. On *Spartina*
Cape May N. J. July 1881
58. Is this *Rhizogonum ru-*
bescens Tul.? On the
ground - autumn.

59. *Helicosporium*
lunibricoides Sacc. ?
Ad culmos putrescentes
Beae Maydis. Autumno.

60. Is this *Pol. brumalis* Fr.
or *P. arcularius* Fr. or are
these two species the same?

61. has the pores smaller than
in spec. of *P. parvulus*
in N. A. Fr. = *P. perennans* Fr. ?
Ae terram. Nephila Aut.

62. On dead trunks
near Cincinnati. Ohio.
Imbricatus = *P. constrictus* ?

63. Geaster
from Ohio

64. *Periza chrysostigma*?

65. Is this *Hypoderma ilicinum* Duby?

On some coriaceous leaves. Florida U.S.A.

66. *Lophoderum Guiniferinum*
Adfolia Cupressi thyoidis?
Autumn - New Jersey

There is no hurry - Please
examine them at
your leisure & oblige

Yours truly

J. B. Ellis

67 Ad ramos adhuc
vivos (et mortuos) Cerasi?
"Mountain Cherry" Utah

68 ut mihi videtur,
nov. sp. generis *Pruniceae*
Prunus - forma in
branchis & Rose?
in on wood - Utah
N. S. A. 6000 ft. alt.

Prunus Utahensis (unhi)

Prof. P. A. Saccaro
 in Acc. with J. B. Ellis
