4 LEACRIL RETRAIBILI

per dar volume ed esaltare le caratteristiche dei filati.

Una ricerca originale dei Laboratori SIPA: ed ecco 4 fibre con diverse caratteristiche di retrazione e quindi di voluminosità. È una possibilità di scelta in più. È un'altra conferma di una grande capacità tecnica al servizio della moda.

Disponibili in fiocco e top, sono da usare in mischia con altri LEACRIL o con lana, alpaca, mohair, ecc.

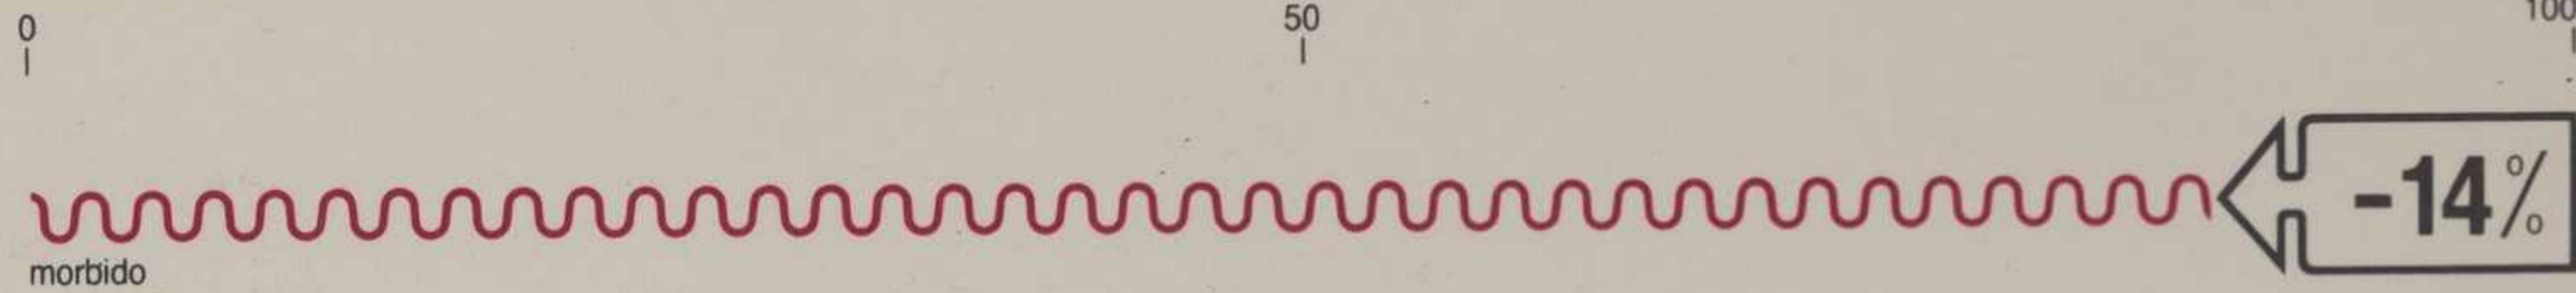

4 SHRINKABLE TYPES OF LEACRIL

to increase yarn bulk and offering unique spun characteristics.

New research in the SIPA laboratories has shown: 4 fibres with differing shrinkage properties, altering bulk capability and offering an even greater choice, which gives a more varied development programme to the fashion industry.

Available in staple and top form, can be blended with either different types of LEACRIL, or with wool, alpaca, mohair etc.

LEACRIL RB

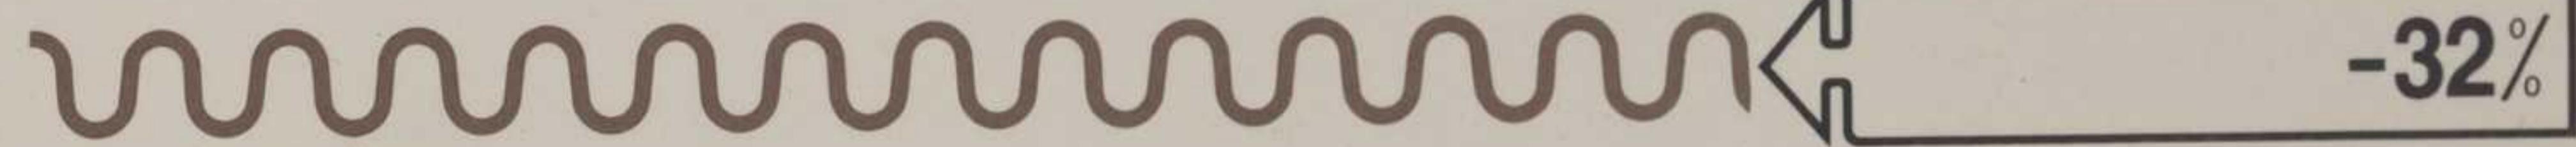

morbido
soft handle

LEACRIL RA

morbido + volume
soft handle + bulk

LEACRIL RS

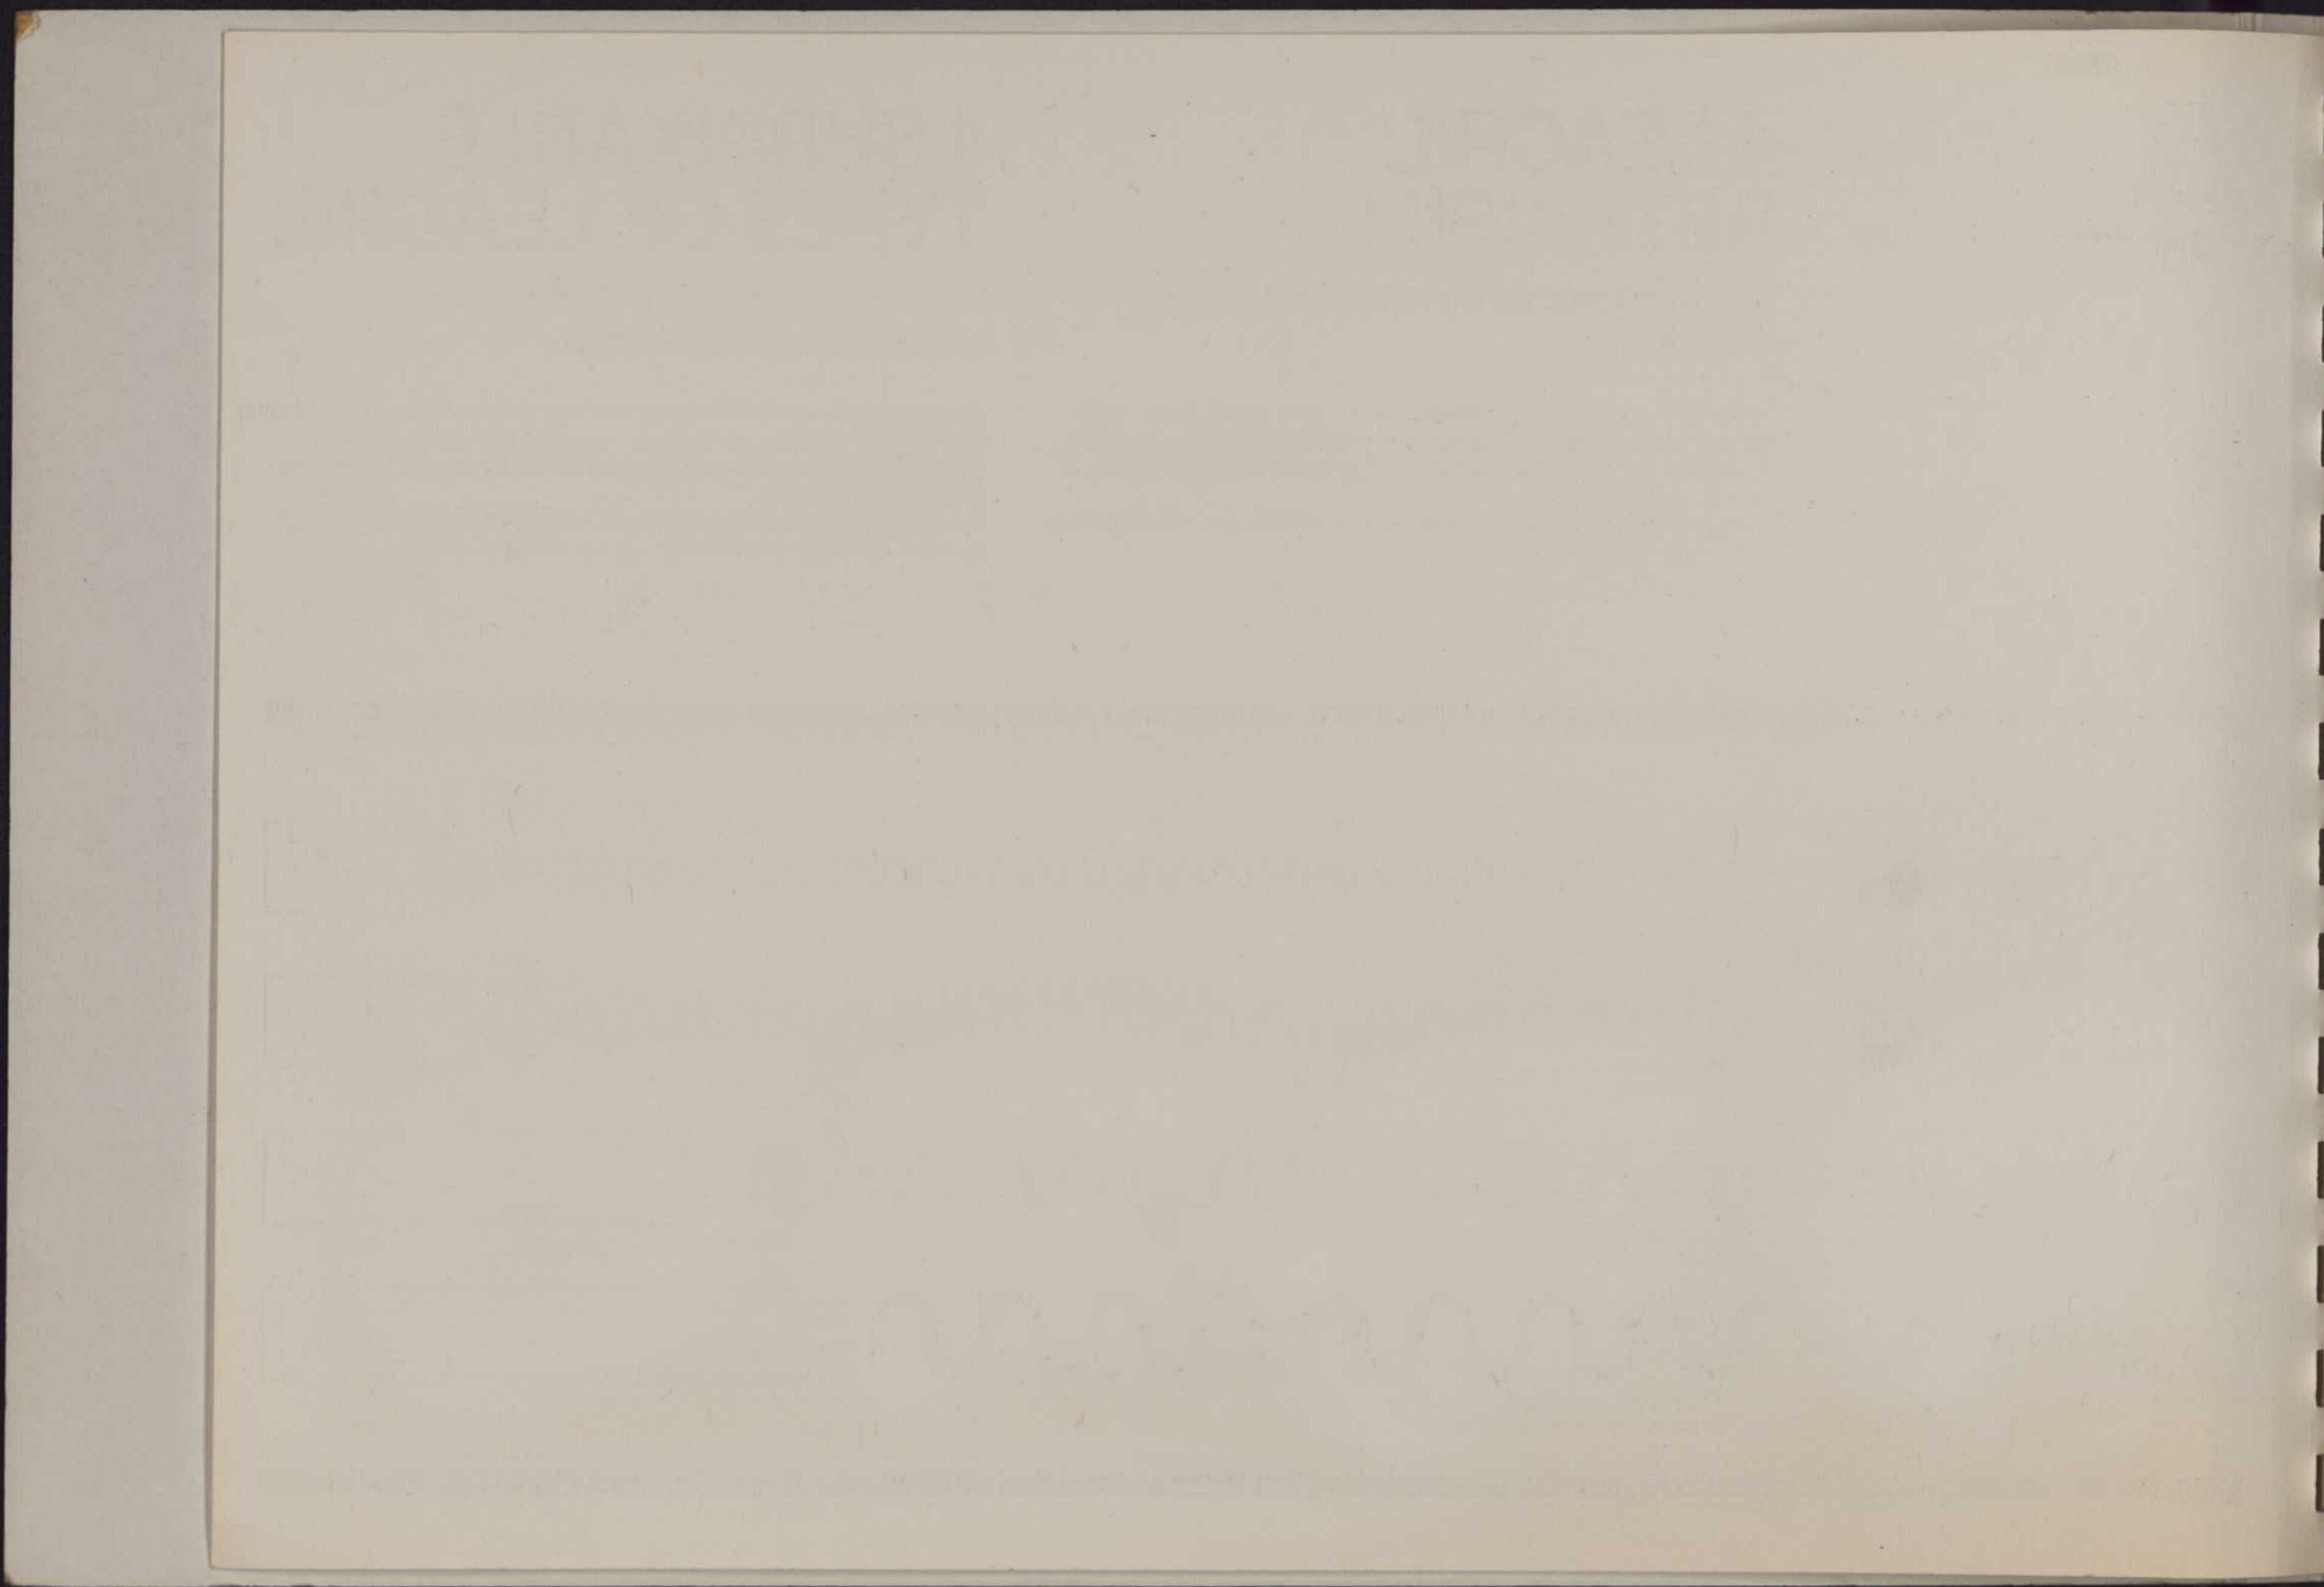

morbido + volume + effetto
soft handle + bulk + effect

LEACRIL RS/S

morbido + volume + effetto + fantasia
soft handle + bulk + effect + fantasy

MORBIDO

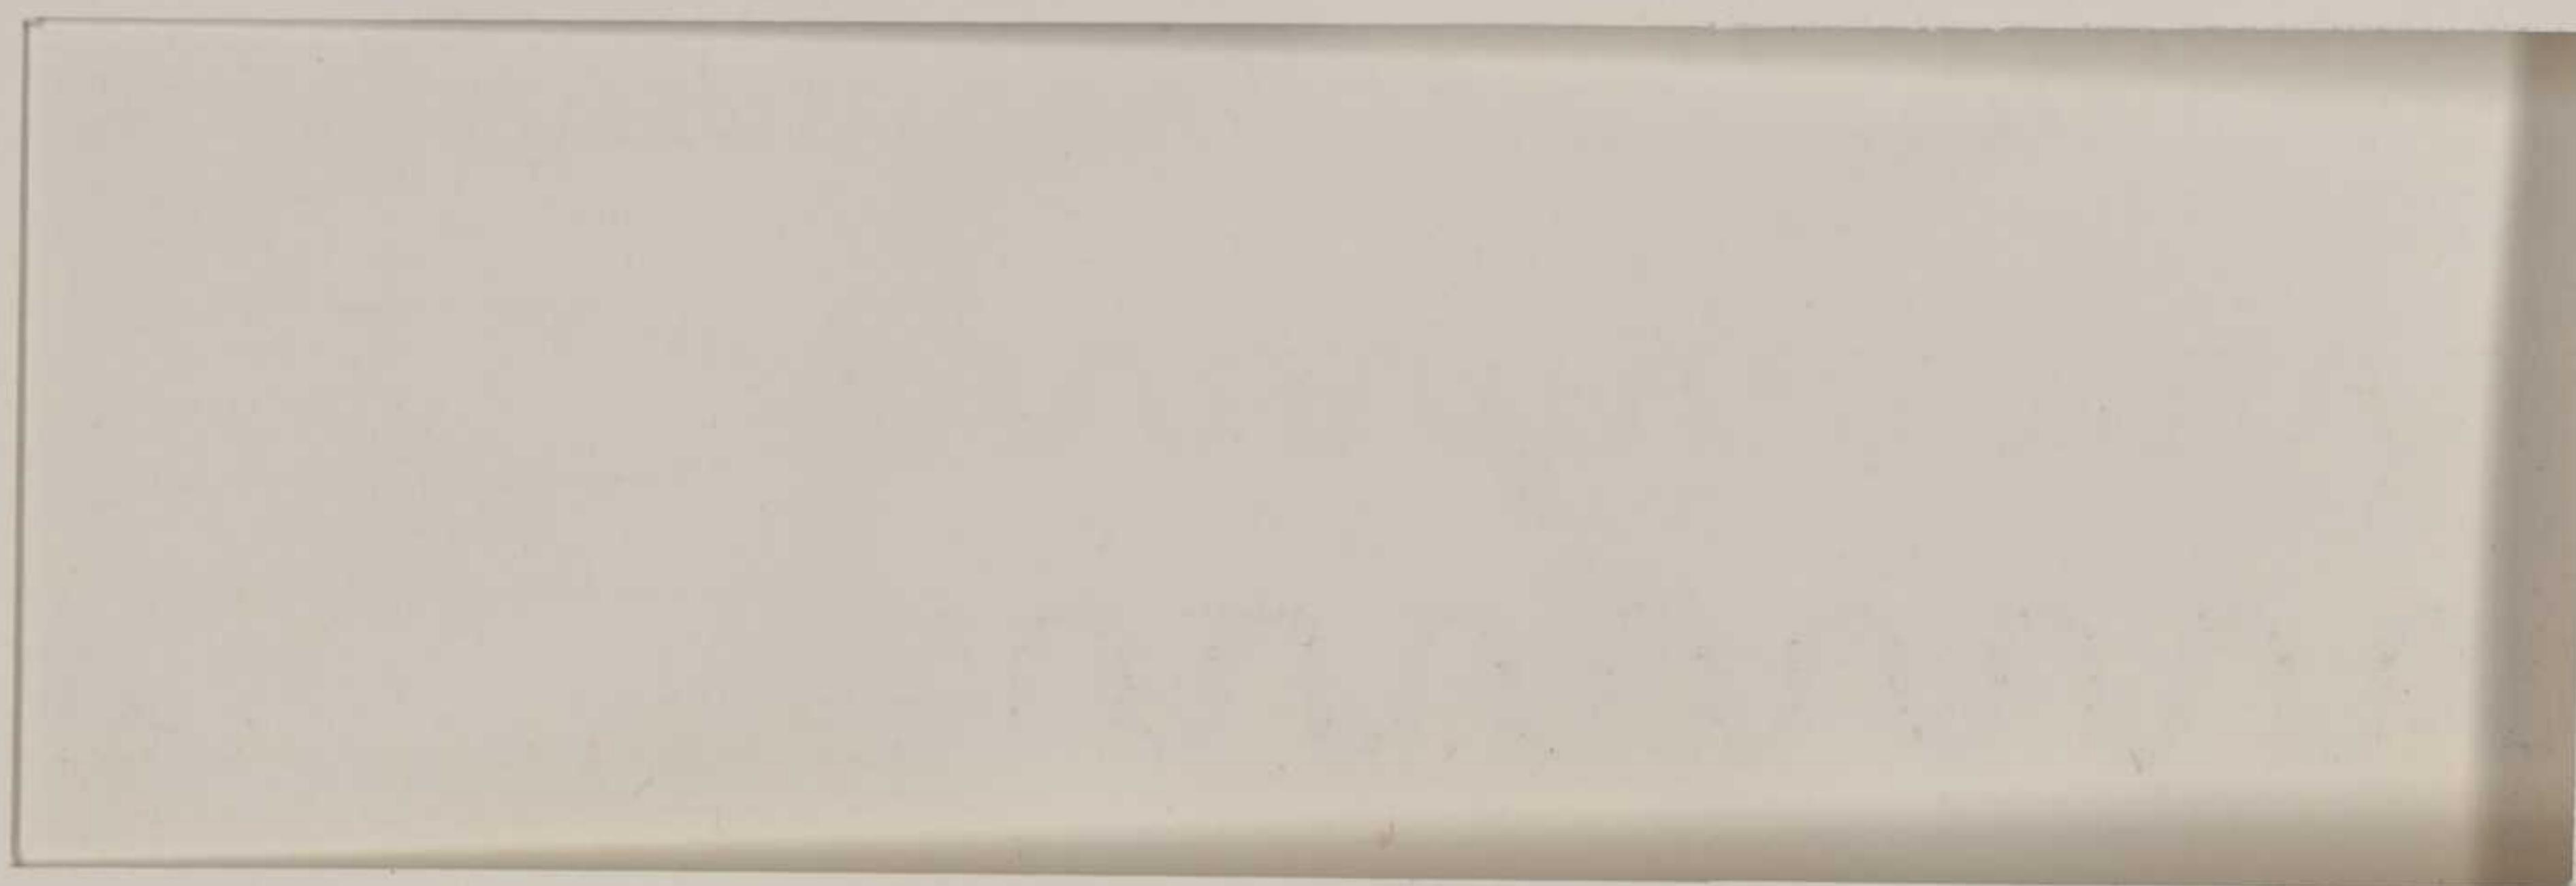

LEACRIL RB

percentuale di retrazione 14%
titolo bava 2,8 dtex

In mischia intima con altre fibre, per chi ricerca effetti di pura morbidezza.

14 percent shrinkage factor
fibre decitex 2,8
Intimate blends with other fibres to produce soft handle yarns.

MORBIDO + VOLUME

LEACRIL RA

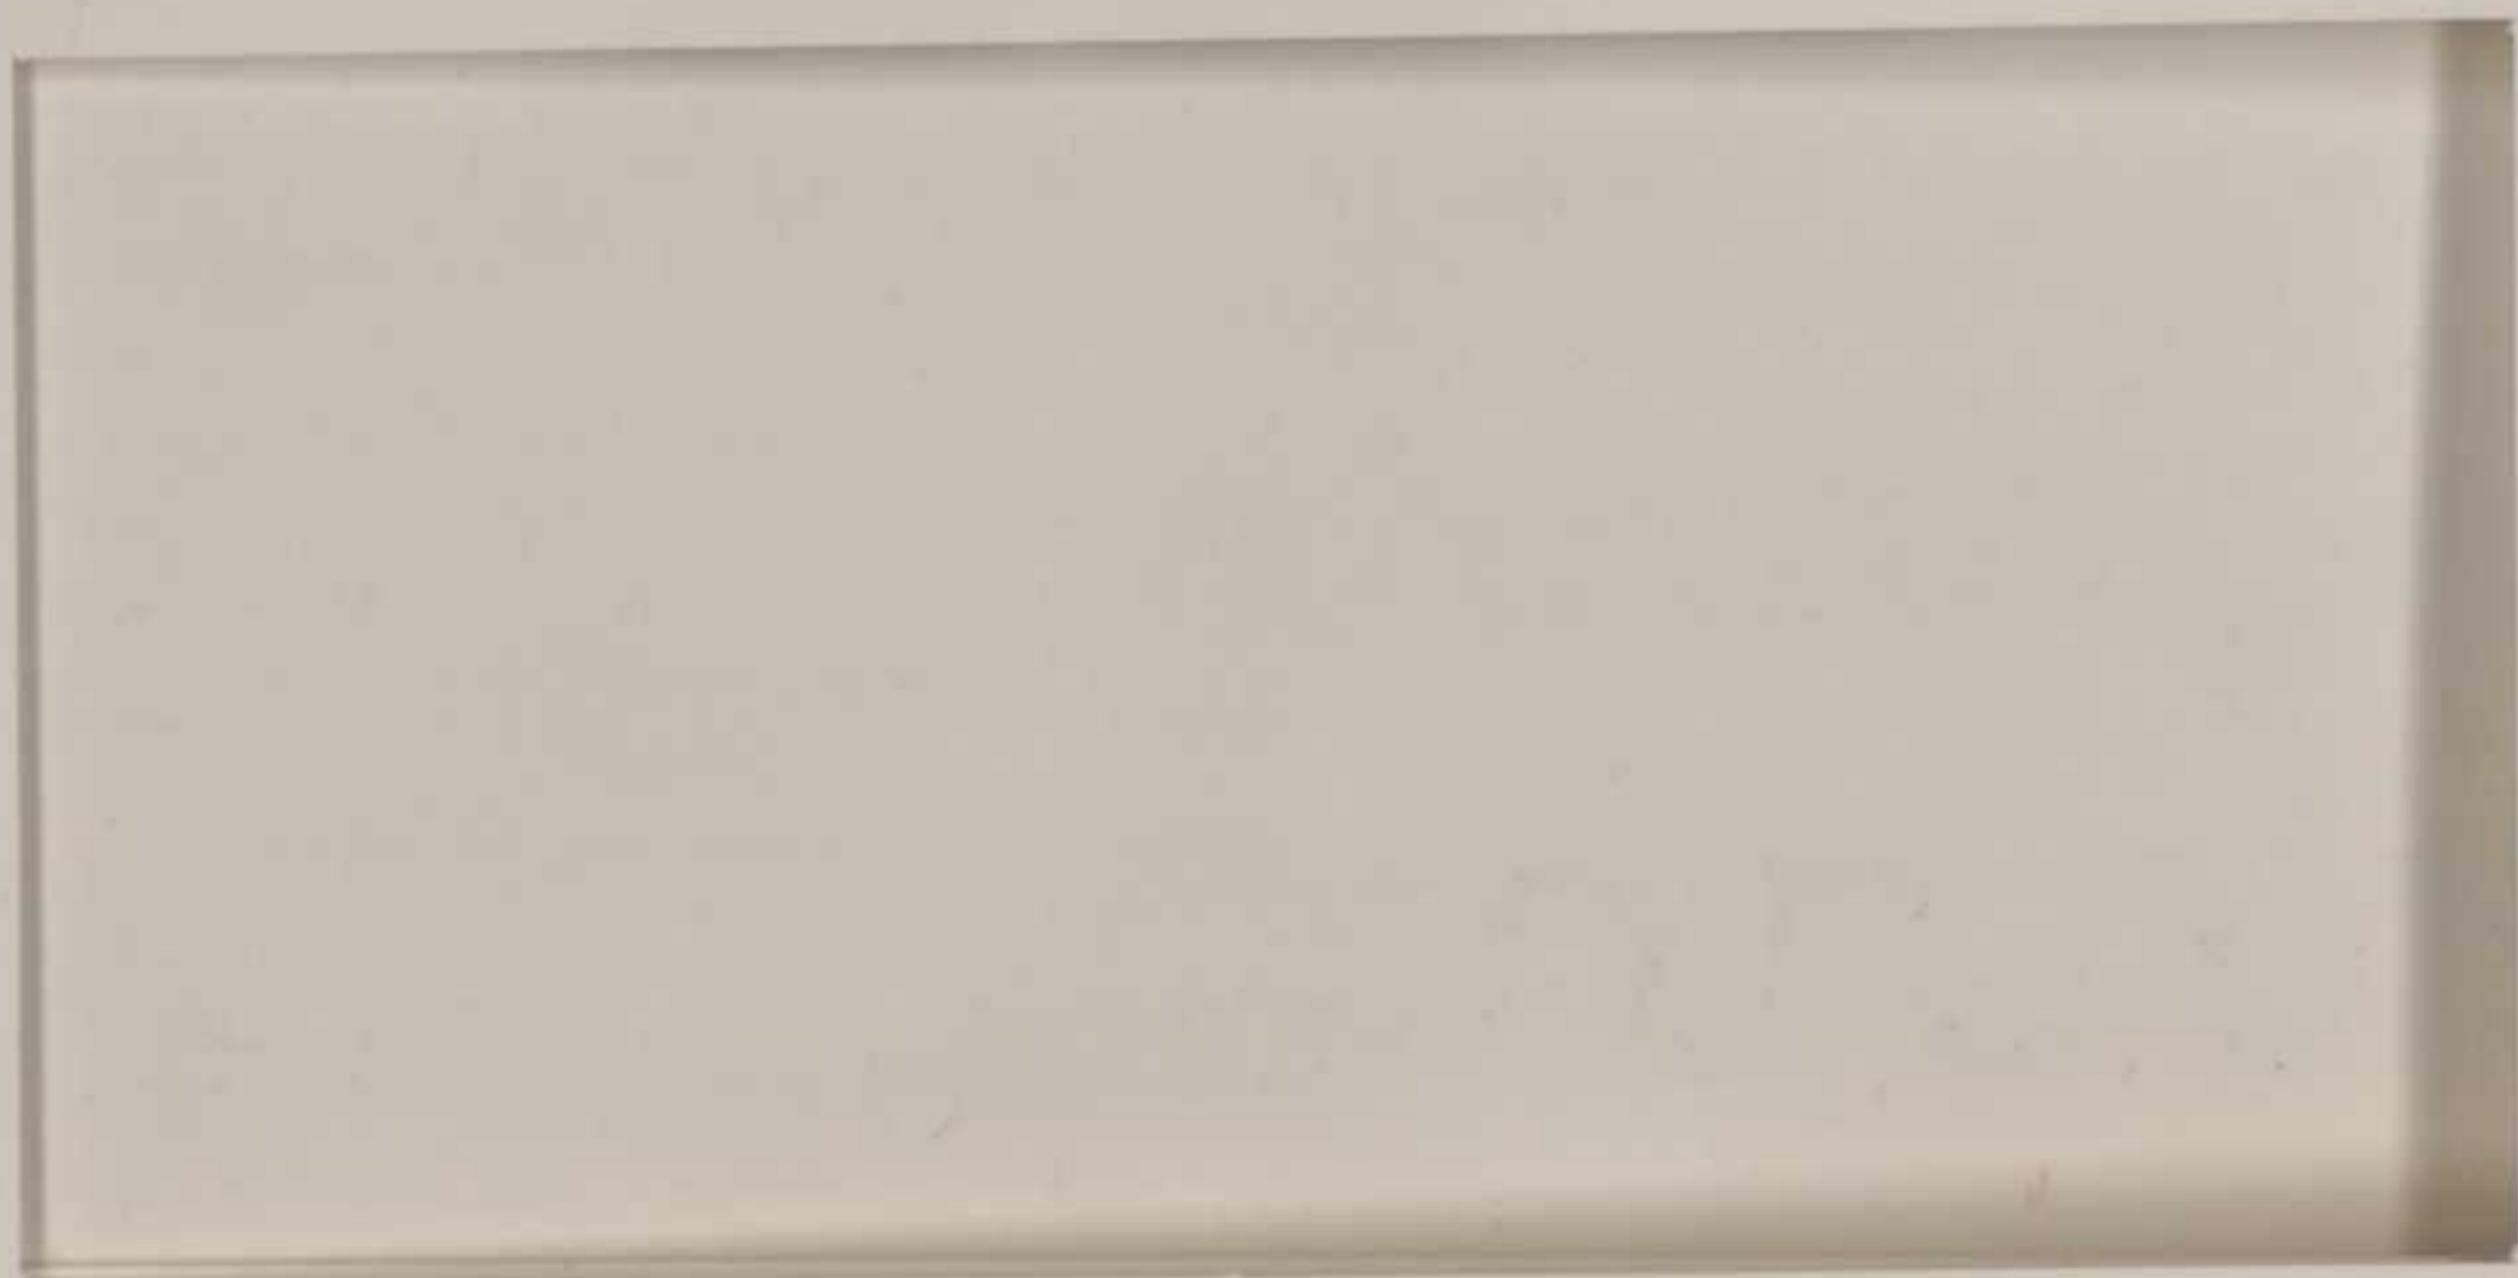

percentuale di retrazione 20%
titolo bava 2,8 dtex

In mischia intima con altre fibre per chi, oltre alla morbidezza, ha bisogno
anche di volume.

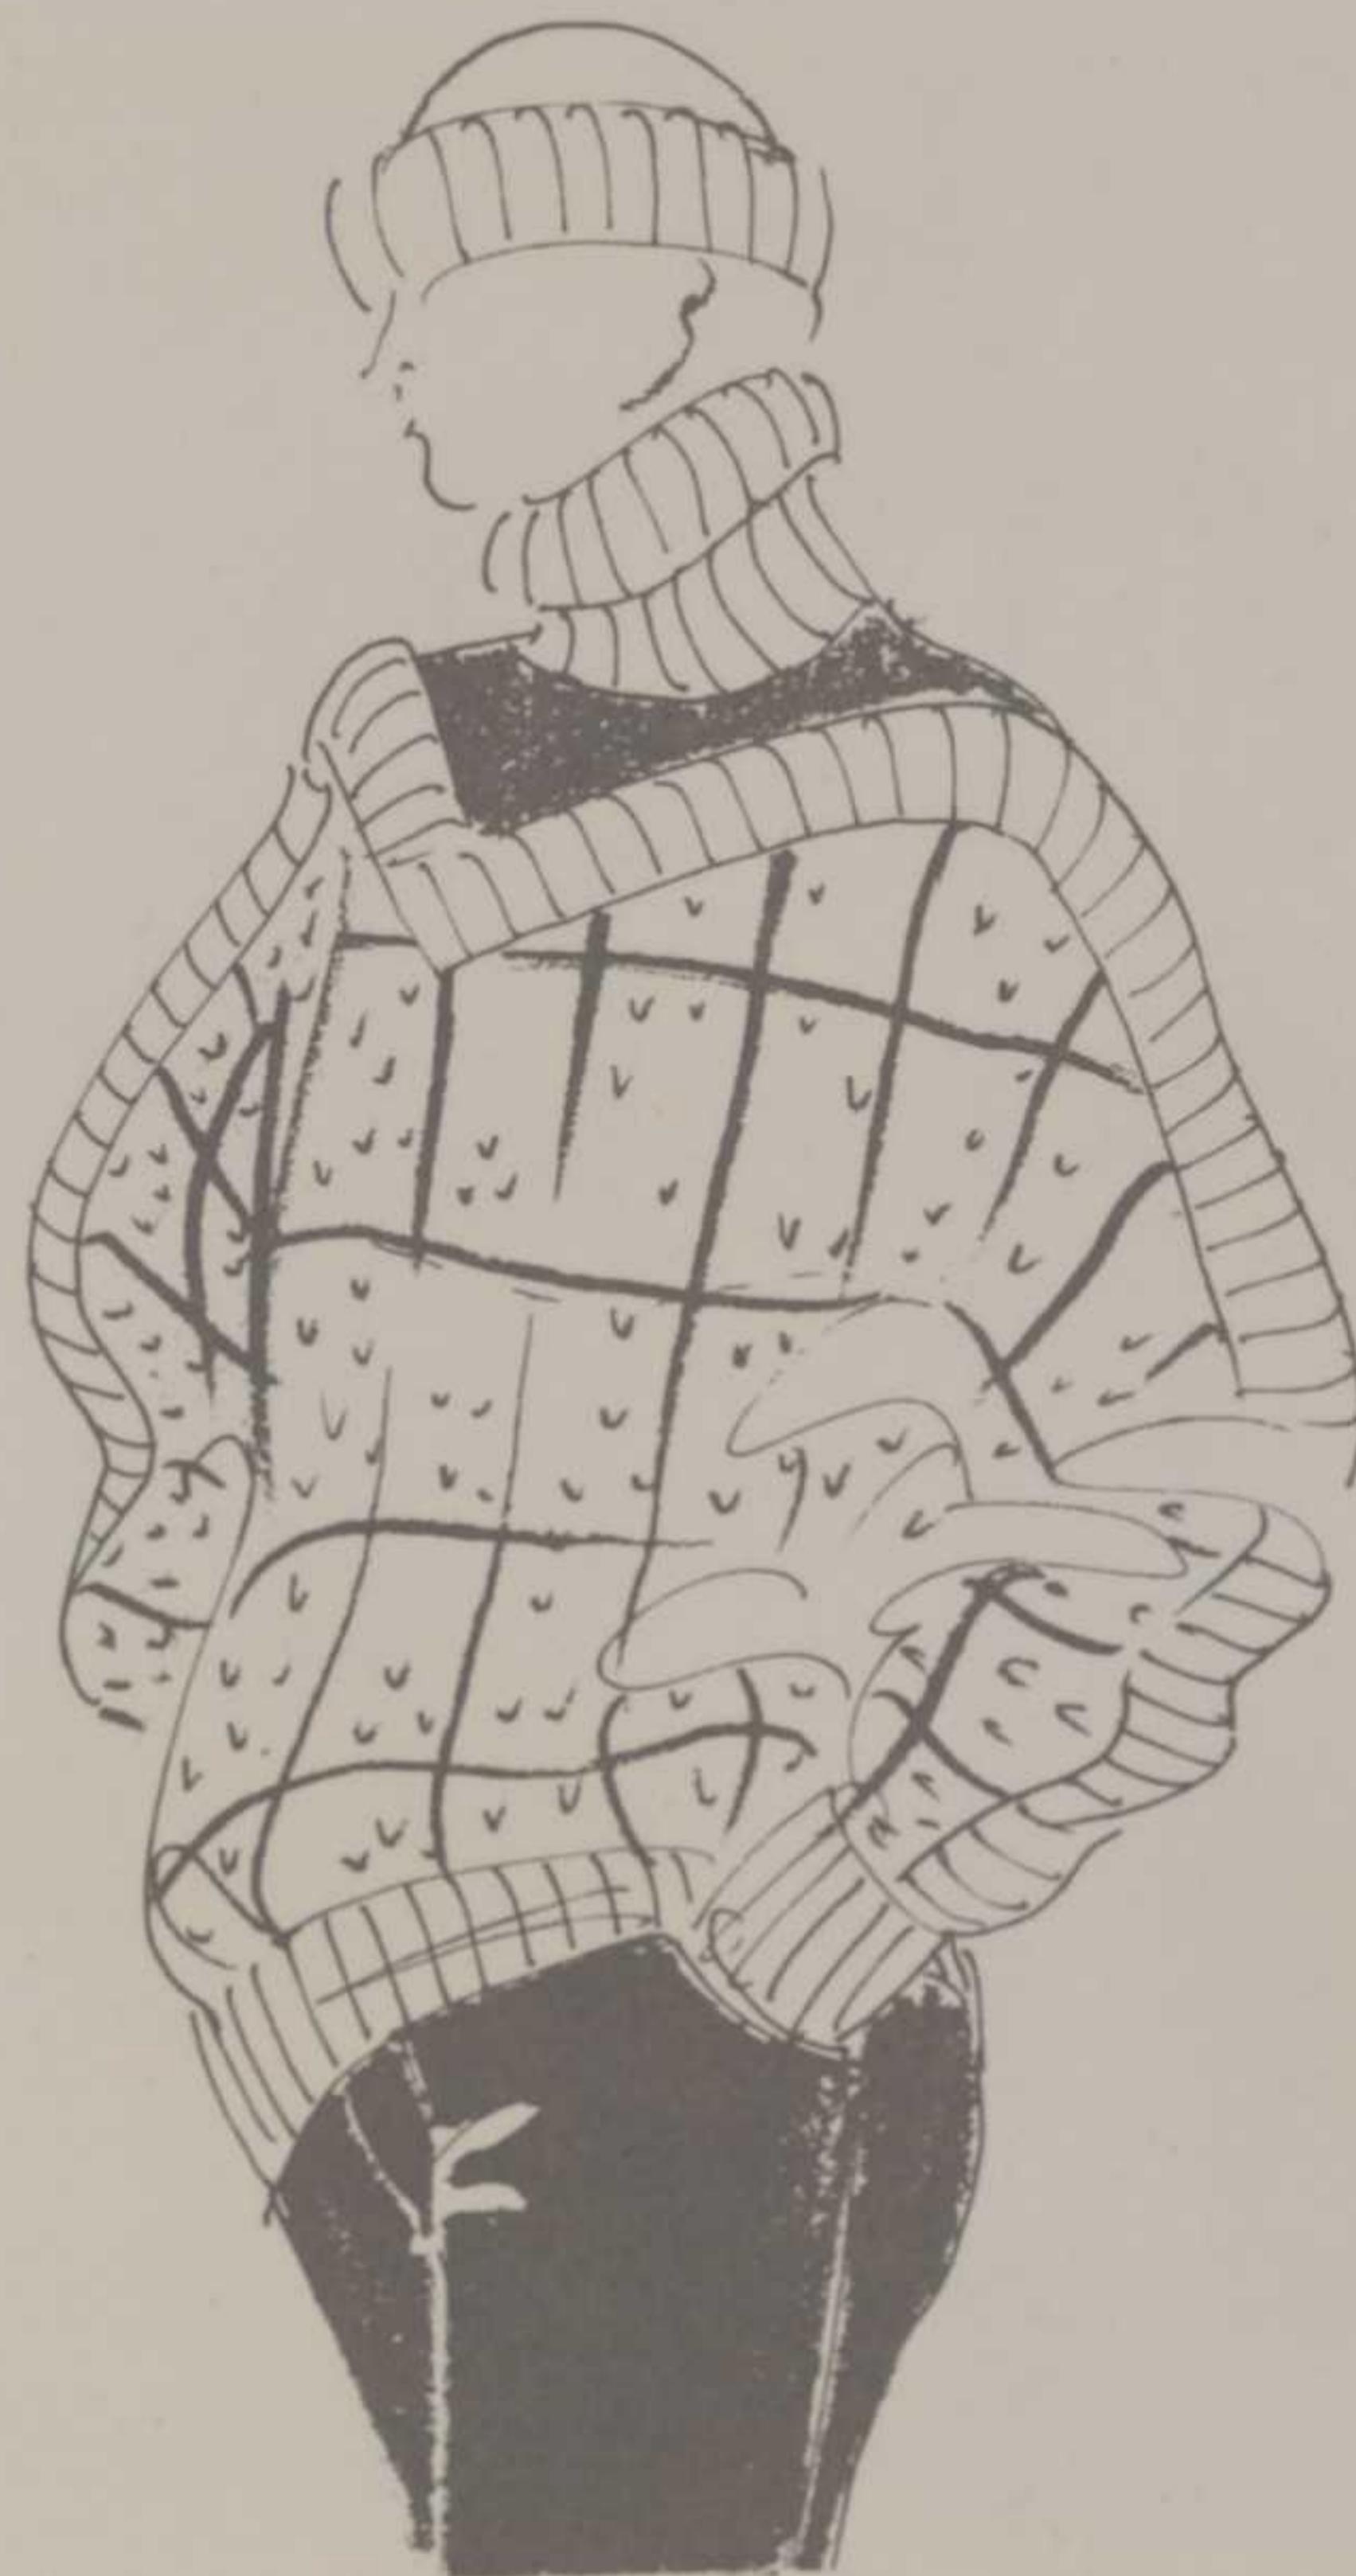

20 percent shrinkage factor
fibre decitex 2,8

Intimate blends with other fibres for bulkiness as well as soft handle.

MORBIDO+VOLUME+EFFETTO

LEACRIL RS

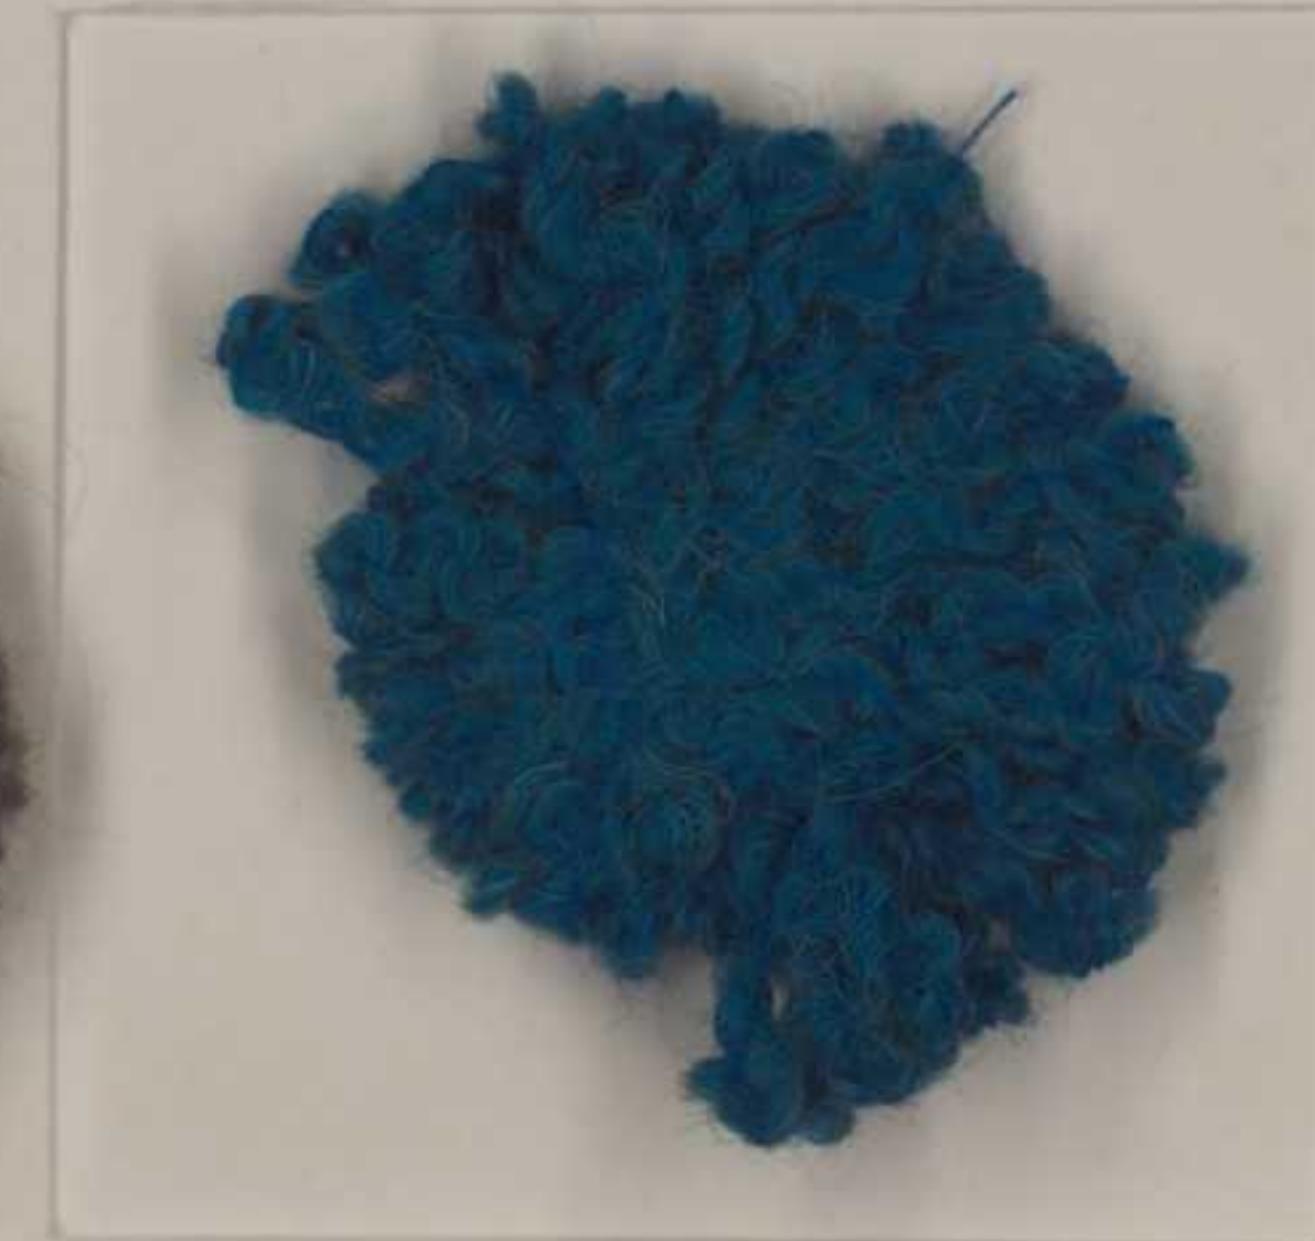

percentuale di retrazione 32%

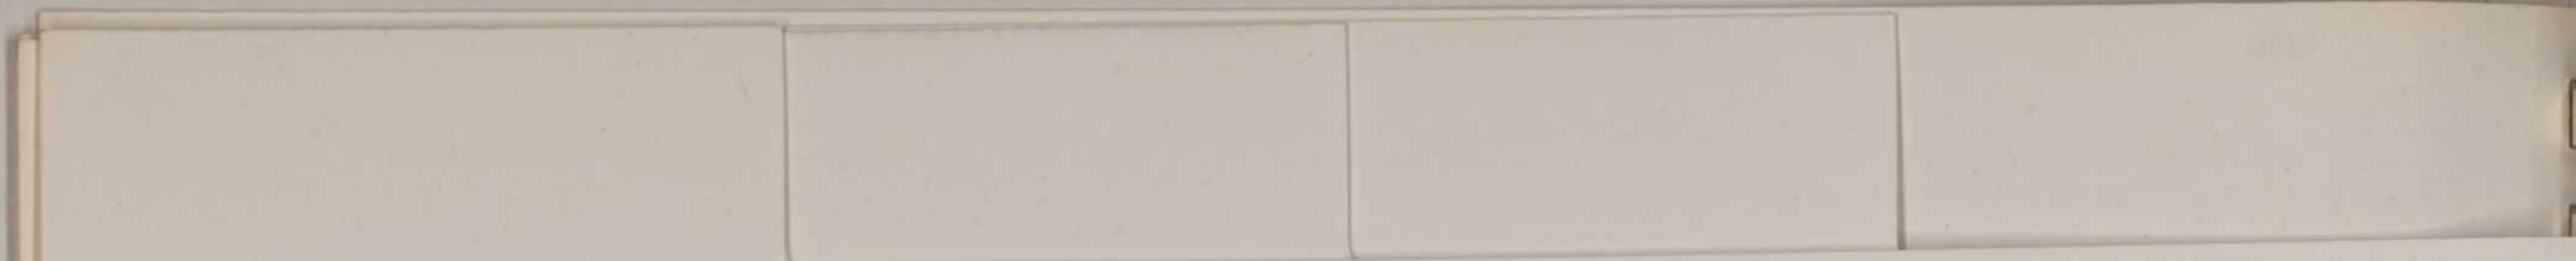

titolo bava 3,3 dtex

Ritorto con altri fili a più capi, assicura – grazie alla retrazione differenziata – effetti ondé, che naturalmente si sommano alla morbidezza e al volume.

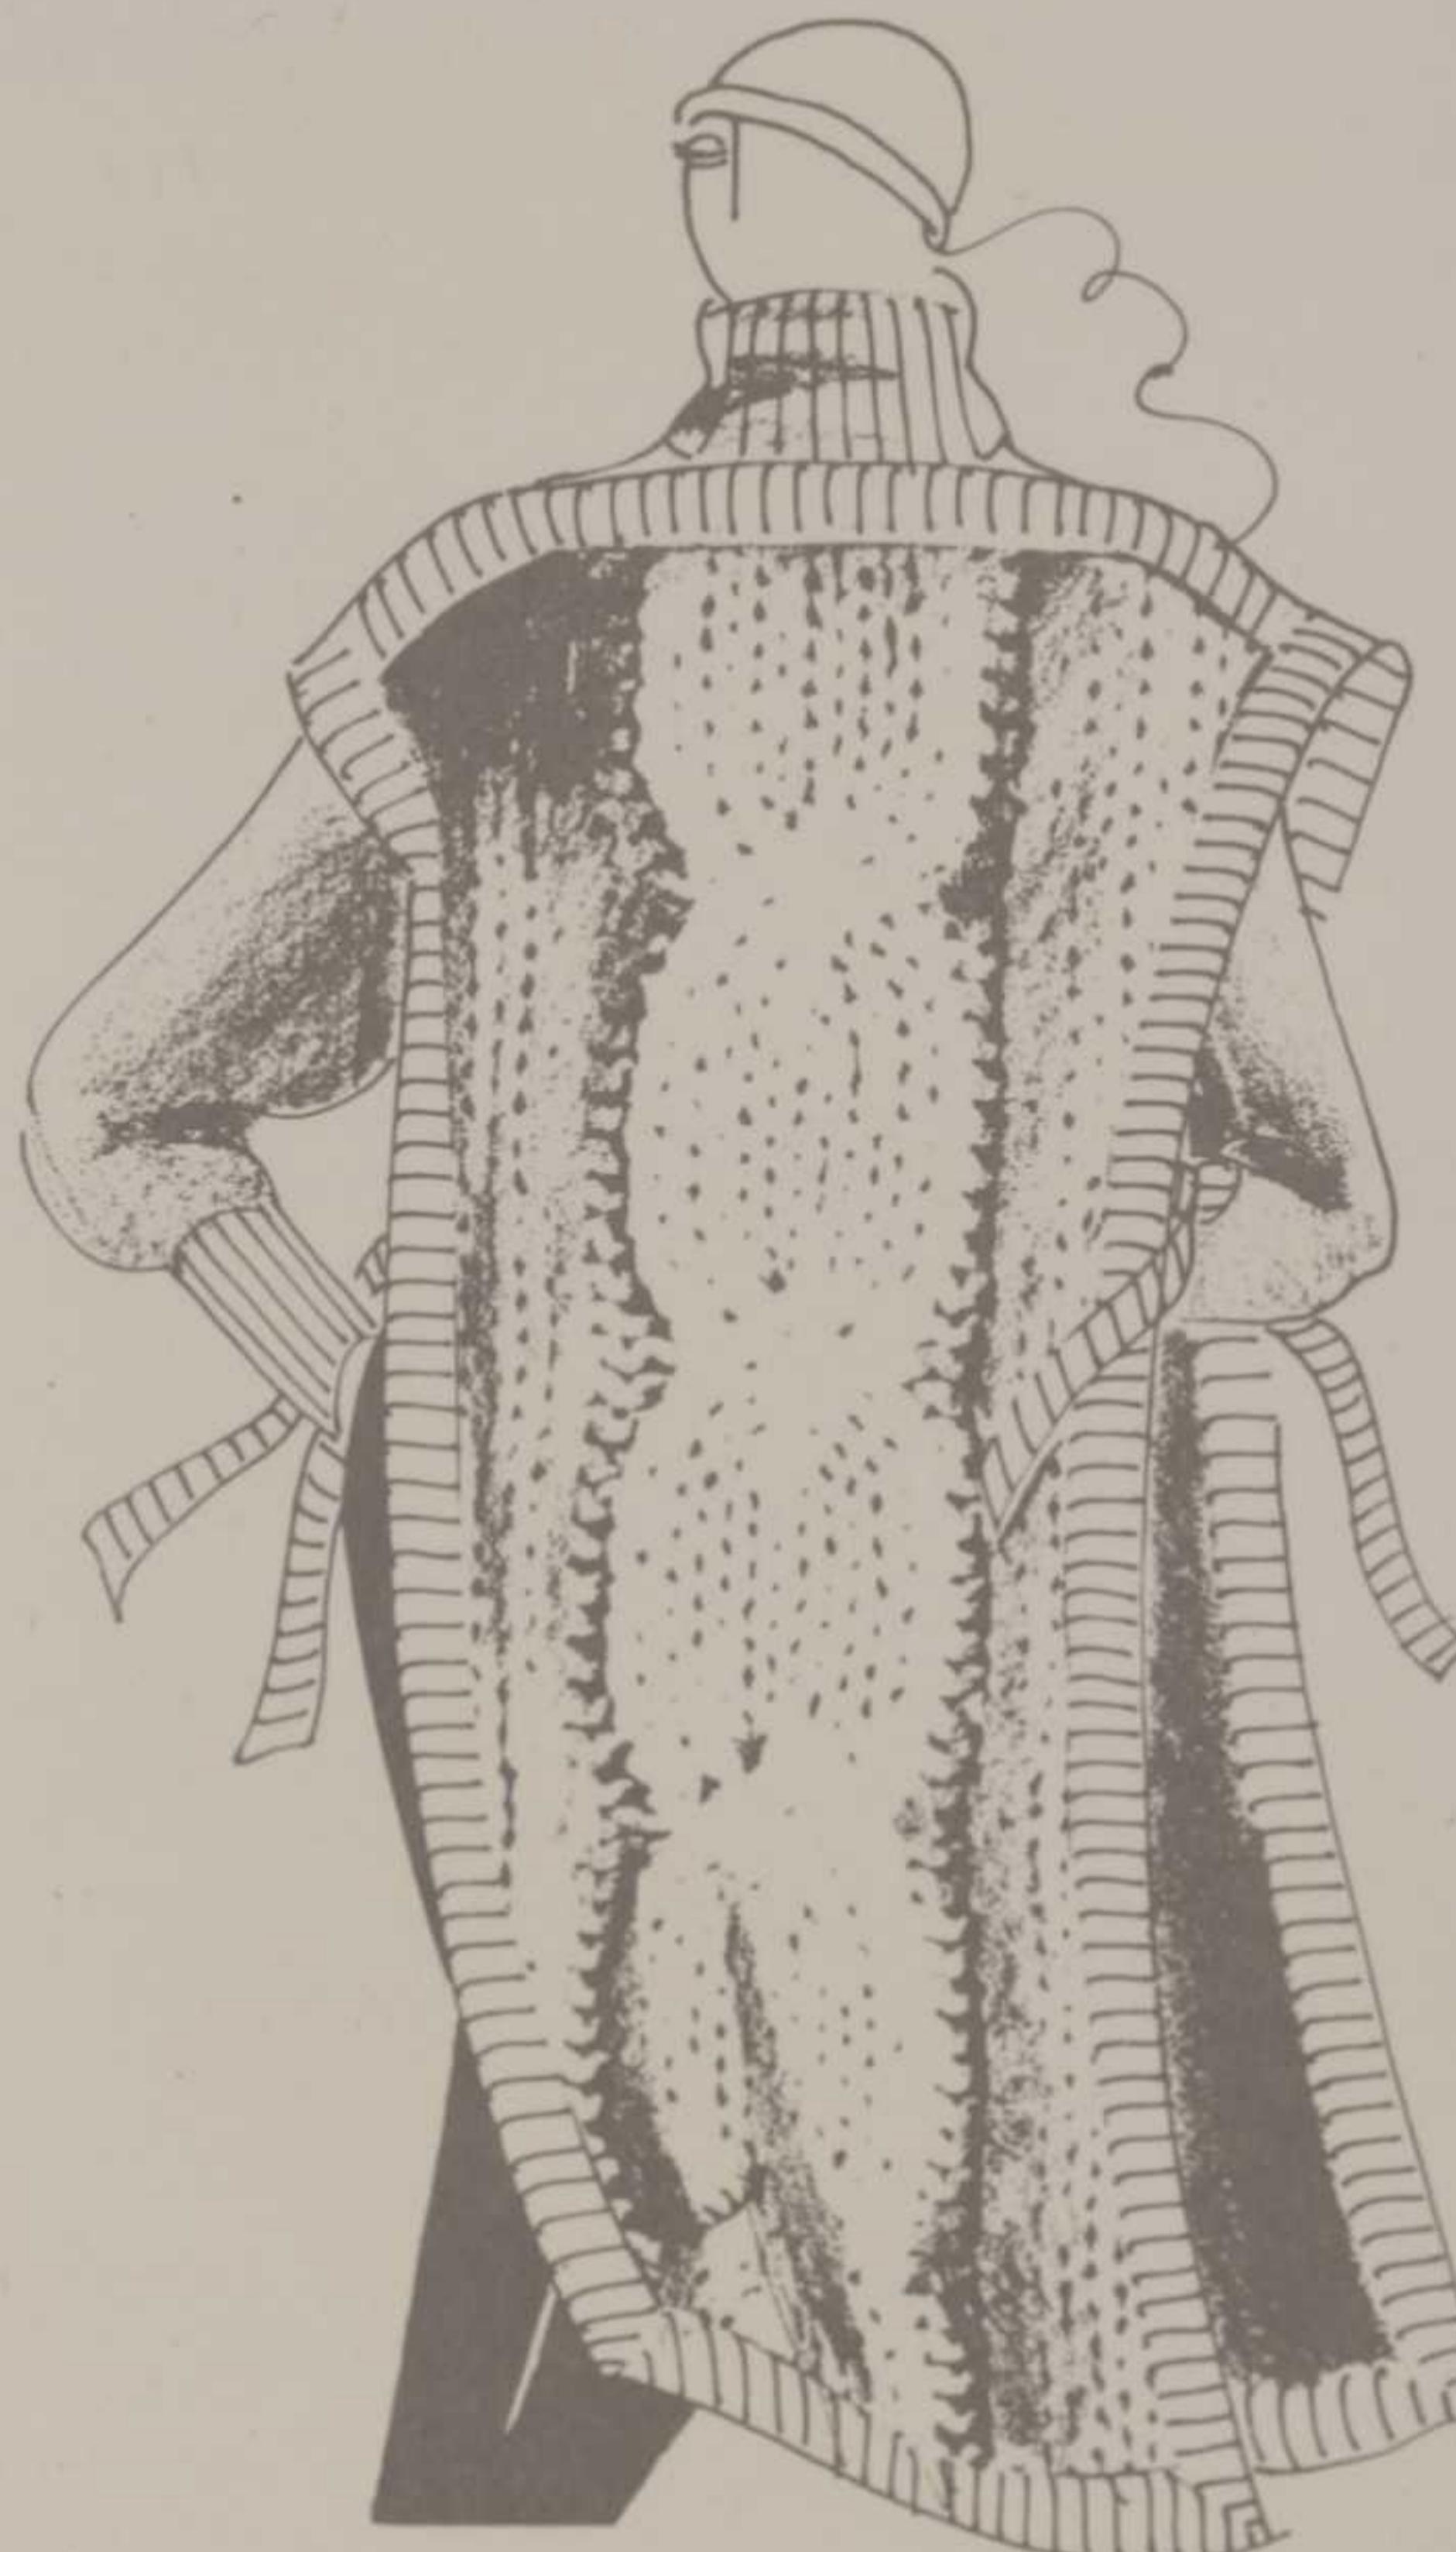

32 percent shrinkage factor
fibre decitex 3,3

Normally used in yarn twists with other fibres, producing irregular effects through differential shrinkage, which obviously produces bulkiness and soft handle.

MORBIDO+VOLUME+EFFETTO+FANTASIA

LEACRIL RS/S

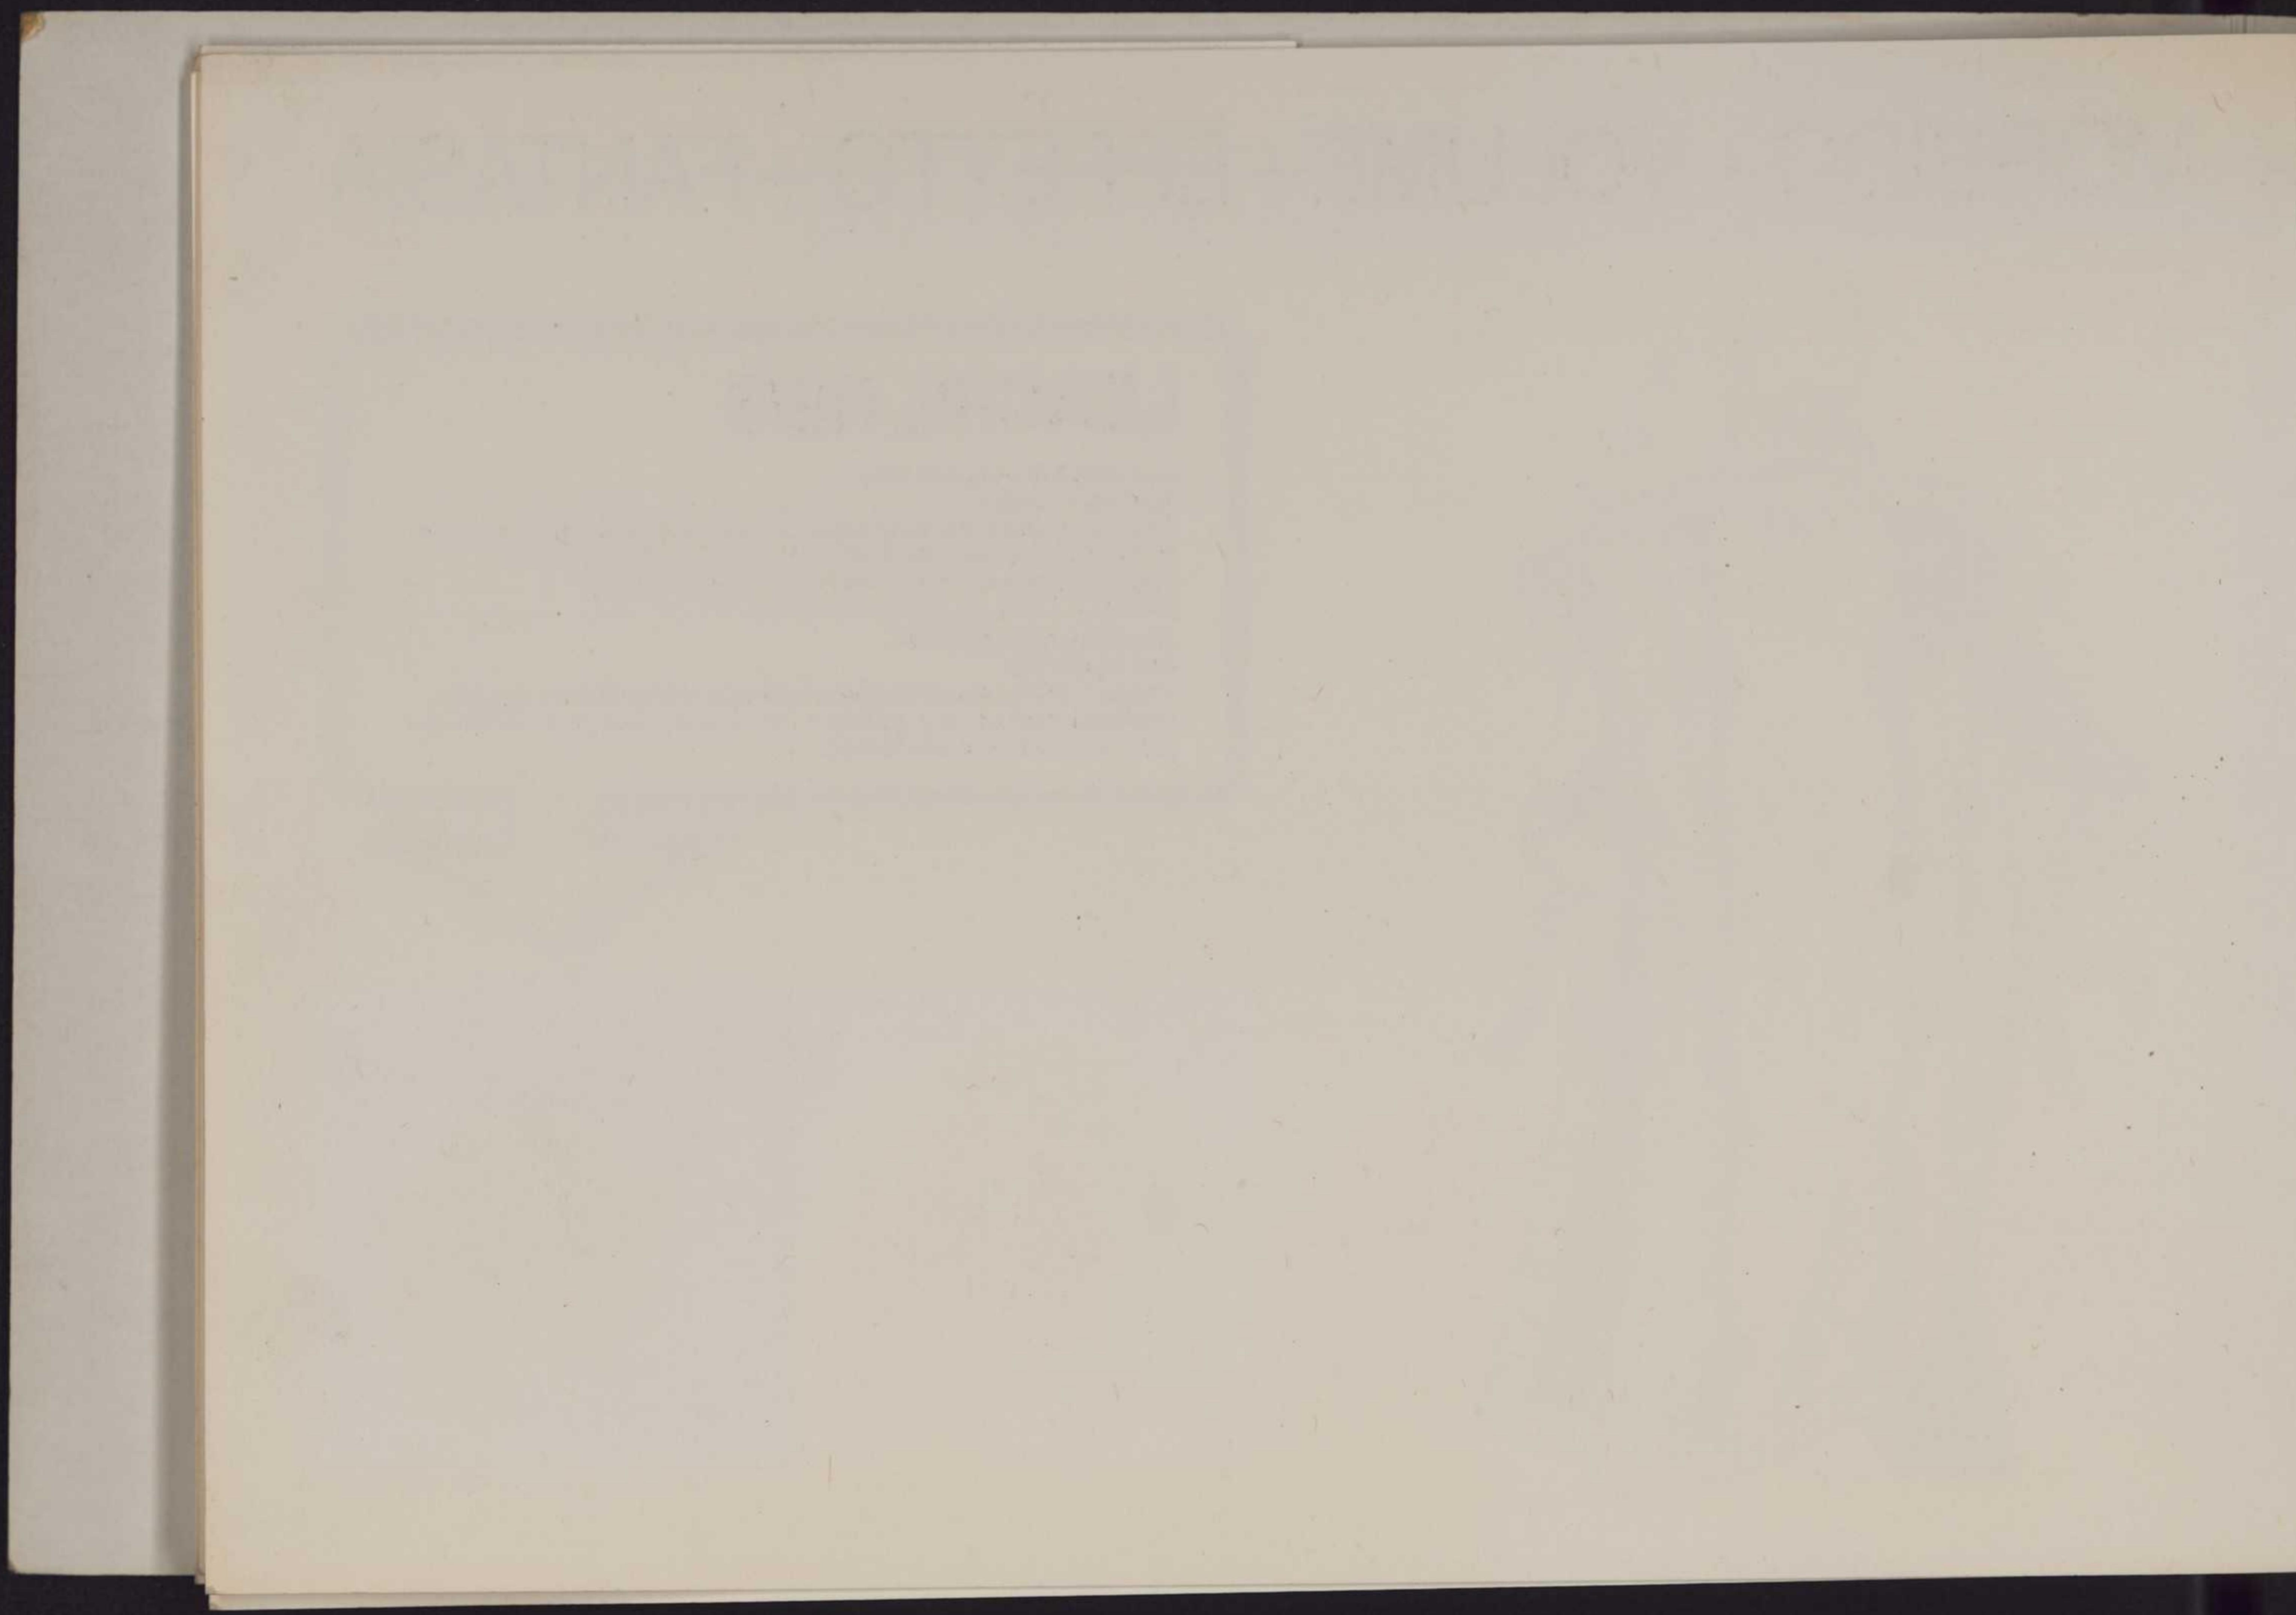

percentuale di retrazione 40%
titolo bava 3,3 dtex

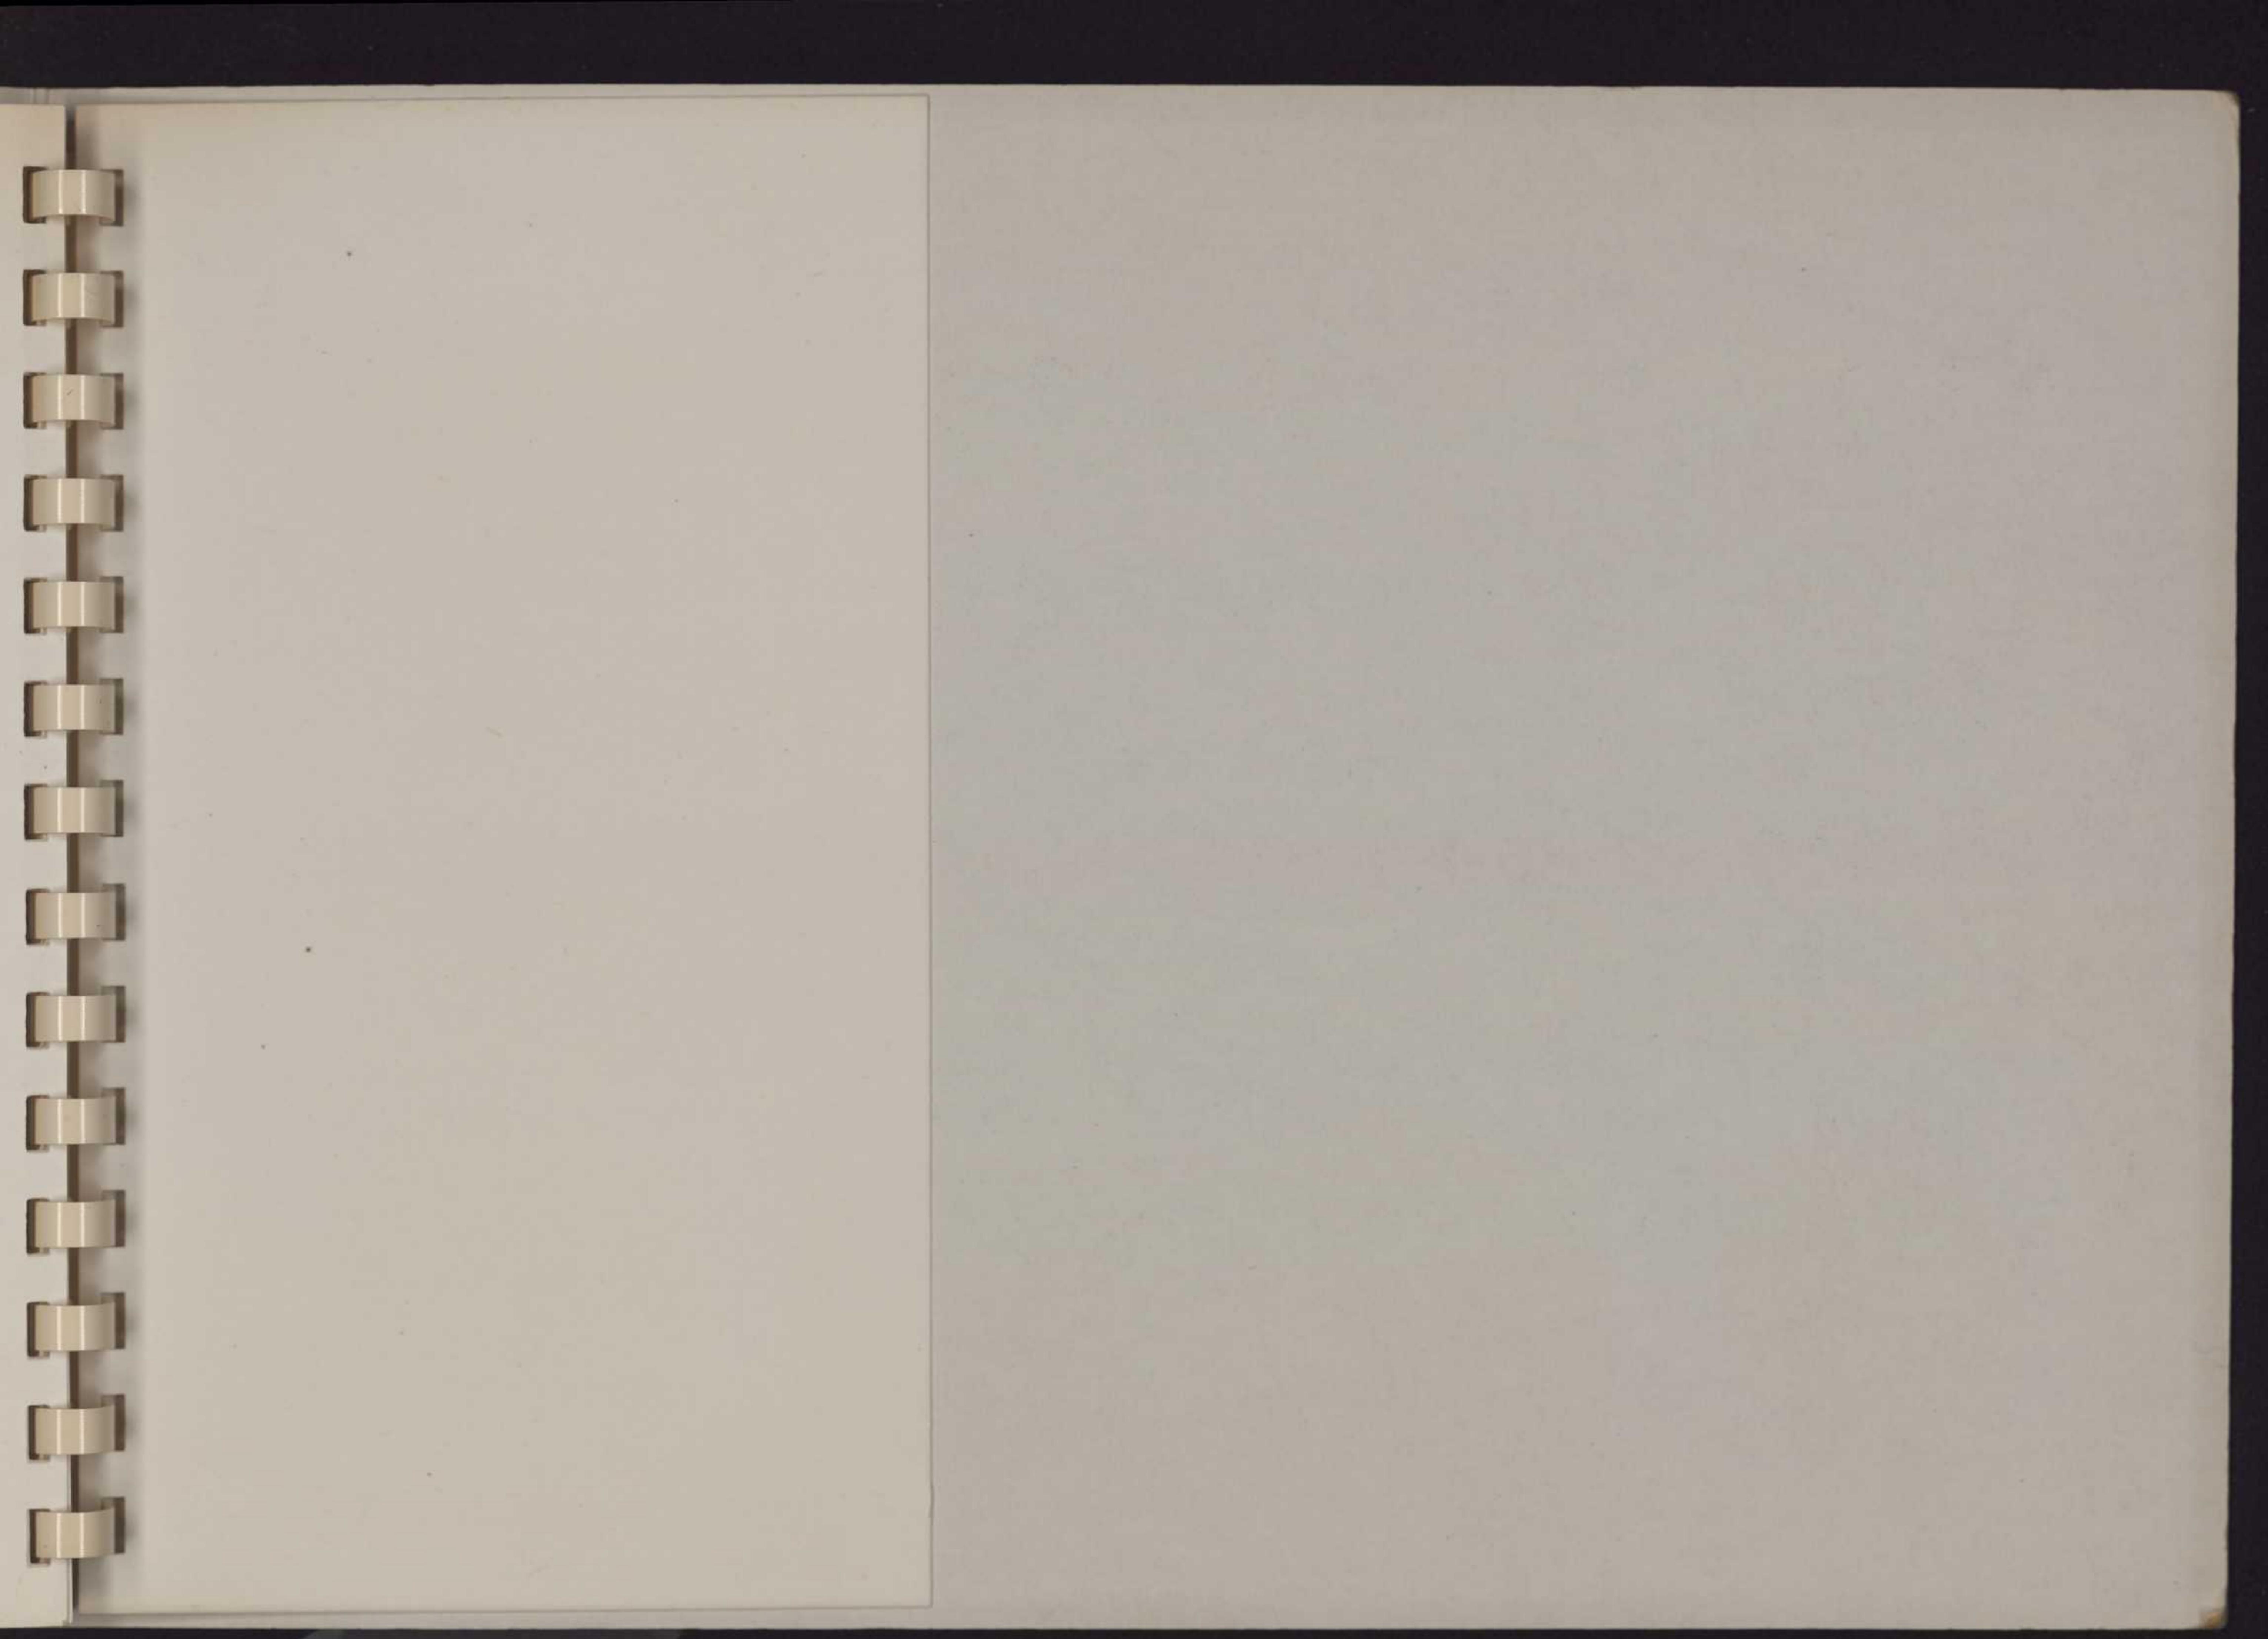

Senza impiegare i "torcitoi fantasia", assicura tipici effetti fantasia bouclé grazie alla retrazione differenziata. Viene usato ritorto con altri fili a più capi, offrendo anche morbidezza, volume ed effetto.

40 percent shrinkage factor
fibre decitex 3,3

Thanks to differential shrinkage fancy boucle effects without using fancy twist machinery can be produced. It can be twisted with other yarns to give soft handle, bulkiness and fantasy.

4 LEACRIL RETRAIBILI

LEACRIL RB -morbido

LEACRIL RA -morbido+volume

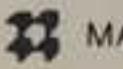

LEACRIL RS -morbido+volume+effetto

LEACRIL RS/S-morbido+volume+effetto+fantasia
