Prof. P. A. Saccardo,

Dear Sir: Your
postal card to hand.

I am much flattered by your
complimentary notice of my papers
on the Fungi of this region. It is
my purpose to continue these papers
and it will afford me pleasure to
send them to you.

I have learned something of your
work through the pages of *Revue*
and also through our friend Mr.
J. B. Ellis of New Jersey. But I
will take great pleasure in ex-
amining it for myself. My text-
books at present are the works
of Fries, of Berkeley and of

Dr M. C. Cooke, the last of whom
is my friend and correspondent.

I have had in contemplation of
late possessing myself of your
Sylloge Fungorum as I am be-
ginning to work more critically
upon the Pyrenomyces. It
will afford me great pleasure
to possess the volumes of your
Sylloge Fungorum omnium.

I am also willing to become a
subscriber to your "Fungi Italici
autographice delineati" or if it
is completed and it is all the
same to you, I will get this latter
work through my London bookseller.

Very Respectfully Yours.

A. P. Morgan.
