

Ithaca, N. Y.,

Sept 16 1907

Dr P. A. Saccardo,

My dear Sir,

I enclose

a specimen of fungus on orange bark
from Florida. Can you tell me
what it is? In some respects
it resembles *Meliola citri*, but
is immature and does not quite
agree with the description. Have
you a specimen, mature, of *M.*
citri, and *M. camelliae* which
you could send me!

I am enclosing also
specimens for new genera which
just published.

Very sincerely yours
Geo. F. Atkinson
