

Los Banos, Philippines
Sept. 5/15

My dear Sir: -

I am sending you a small box
of fungi — but a very important
box. The fungi on *Saccharum* —
officinatum and on *Cocos nucifera*
represent important diseases new
to these Islands and we are exceedingly
anxious to have them authoritatively
determined. We shall be very glad
indeed if you are able to find time
and inclination to examine these.

Yours very truly
C. F. Baker
