GEORGE W. CARVER
 Director Department of Agriculture
 and Experiment Station

Tuskegee Institute, Ala., Aug. 15, 1907¹⁹⁰⁰

Prof. P. A. Saccardo,
 Padua, Italy.

Dear Sir:

For some time I have been casting about for some one who would be willing to determine some troublesome fungi for me. Prof. J. B. Ellis of Newfield, N. J. did this for years before he passed to his reward. Since then I have been unable to do very much.

I have a few very troublesome specimens. I am in a section where there seems to be a great many new things and I am wholly unable to determine them myself.

In the Journal of Mycology of some years ago, which I am sure you have, a list of new fungi from Alabama was published which was collected by myself. I should be very glad to furnish you duplicate specimens of anything you desire that I can collect.

Thanking you in advance for any consideration that you may be able to grant me, I am,

Yours very truly,

Geo. W. Carver.
 DIRECTOR.
state

P.S.

I might say that Dr. L.H. Pammel of the Iowa Agricultural College, under whom I studied for six years, has directed me to you.

Of course I have known of you for a number of years.
