

London, Ontario, Canada 7 Jan. 1914

Dear Professor Saccardo, I have to
thank you for your letter containing report
on my No 3499 Botrytis peronosporoides Sacc. on
Benjoin and other species.

With this I am sending a few specimens,
some ascomycetes and others — mostly on Colutea
arborescens. I have found some of them
very interesting.

Yours very faithfully
John Dearness
