

Santa Ana, California, U.S.A.

July 6, 1914.

Gentlemen: I have a few trees left of a hybrid between a live oak and the California walnut.

It has been named Juglans quercifolia. It is believed to be the rarest tree in the world. This beautiful tree bears oak-like leaves and walnut-like nuts.

I have filled an order from Edinburgh for half a dozen trees, one from Kew, Berlin, Hamburg, New York, St. Louis ~~bees~~ and elsewhere.

I can mail this tree at \$10.00 each.

—FROM—

Sincerely Yours,

Newton B. Pierce.
