E. S. SALMON, F.L.S.

Nov. 12. 1916.

Dear Prof. Saccardo,

I have pleasure in sending you our paper
on the parasitism of Phoma cinerescens.

We are now investigating all the forms
we can obtain of Monilia fructigena
and M. cinerea, and we are particularly
anxious to obtain M. laxa. If you can
from time to time send us living examples
of any of these - or if you can tell us to
whom to write in order to obtain Italian
examples - we should be very grateful.
If it is possible, we should like to investigate
the parasitism of the ascospores of
these species. With kind regards.

Yours sincerely,
Ernest S. Salmon.
